The acclaimed 45 minute documentary Canada C3 - Canada Coast to Coast to Coast, follows the historic 150-day, 25,000km expedition which sailed Canada's coastline, from Toronto, Ontario to Victoria, British Columbia via the Northwest Passage. A signature project for Canada's 150th Anniversary of Confederation, the inspiring journey explored Canada's past, present and future.

The documentary takes the viewer along for the journey, showcasing the beauty of Canada through extraordinary and inspiring footage from coast to coast to coast. It delivers emotional, powerful and inspiring messages about science, the environment, truth & reconciliation, youth engagement, diversity and inclusion, all key components in building a better Canada and a better world. C3 is a journey of hope that reinforces how when we all paddle in the same direction we can get where we want to go.
